

CANADA'S FIRST MANUFACTURER OF

# < - - - - - ALL ALUMINUM SEMI-TRAILERS - - - - - >

## STANDARD FEATURES

### Higher resale value

By using high grade 6061-T6 precipitation-strengthened aluminum.

### Maintenance Free design

The two main beams are riveted in the center of the web where the stress is at its lowest.

### Extended Life

Our engineered high strength aluminum "T" crossmembers increases strength and reduces weight.

### Lowest cost of ownership

A unitized floor design welded to the crossmembers increases strength, lowers maintenance and extends life.

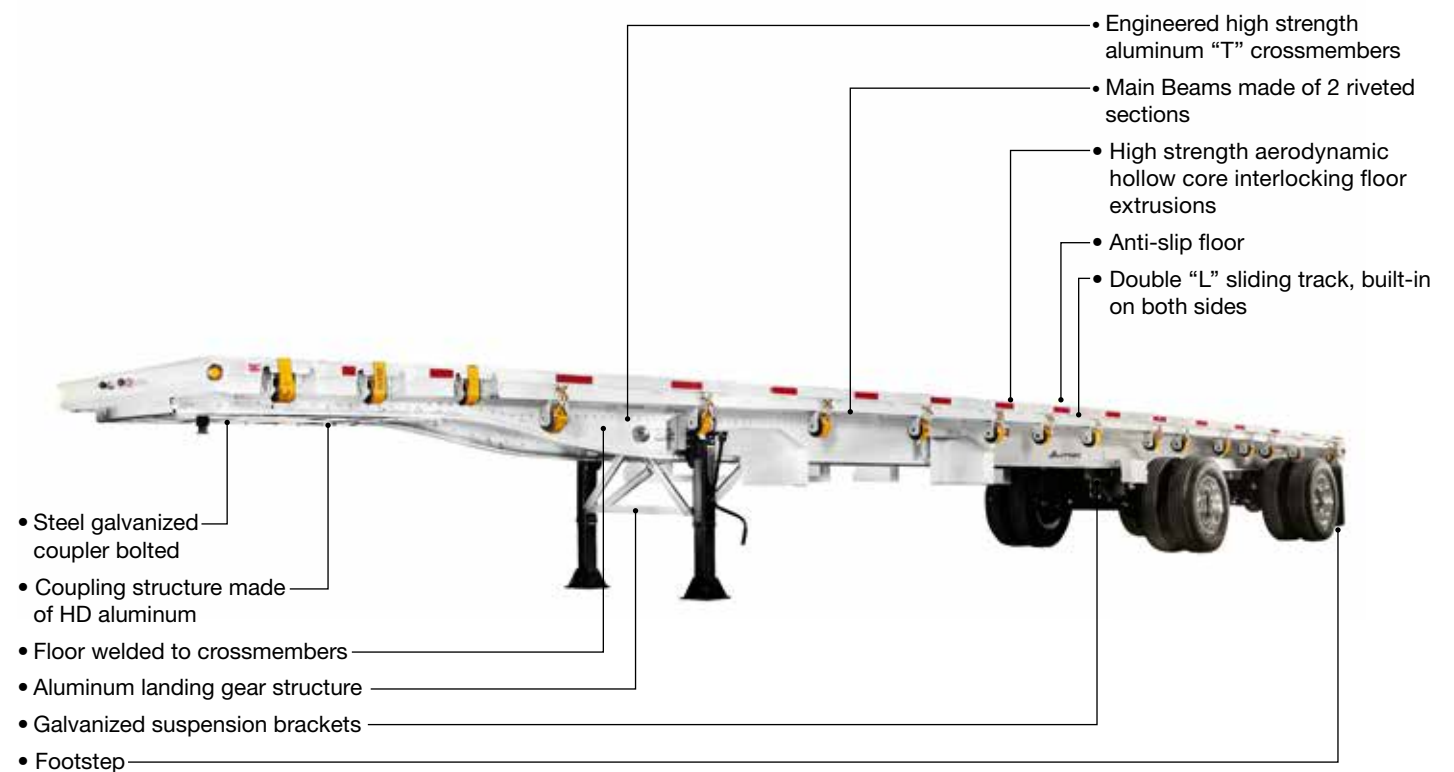

### Increased Profitability

The high strength aerodynamic hollow core interlocking floor extrusion is thicker and reduces damages.

### Maximize revenue with increased payloads

The coupler support structure is made of aluminum providing a superior strength to weight ratio.

## OPTIONAL FEATURES

### Gooseneck heights from 4" to 10"

### Heavy duty reinforcement (coil package)

### Aluminum Landing Gear

### Recessed winch

### Floor anchor rails with multi-position cargo hands

### Mirror finish stainless steel plate. Built-in pull hooks for bumpers

Many other options are available such as: sliding bogie or tandem, self supporting toolbox, headboard, logging set-up assembly, stainless steel mirror finish components, footstep, floor anchor rail, sliding tarp & curtain side systems, call us for more information.

## SPECIALIZED TRAILERS

- Logs: lightweight bunks & stake package
- Glass: "A" support structures
- Steel: coil package
- Custom configurations for 2 & 3 axles

## DROP TRAILERS

- Multiple configurations: 2, 3, 4 and 5 axles
- Maximize volume: very low profile gooseneck and deck
- Protection against weather conditions: sliding tarp & curtain side systems
- Double-drop configurations

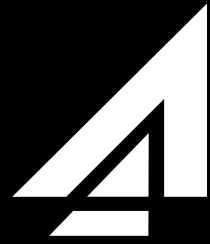

## MULTI-AXLES

- Custom configurations from 3 to 8 axles and B-train
- Glass: "A" support structures
- Heavy duty floor
- Stakepocket built-in to side rails

Features are subject to change without notice
